

Shorten

```
import java.util.Scanner;
```

```
public class Shorten {
```

```
→ public static void main (String[] args) {
```

```
Scanner stdin = Scanner new (System in);
```

```
System.out.print ("Enter a word: ");
```

```
→ String word = stdin.next();
```

```
char firstChar = word.charAt(0);
```

```
char lastChar = word.charAt(word.length() - 1);
```

```
System.out.println (firstChar + "-" + lastChar);
```

```
}
```

```
}
```
