

## MEDIAN OF 3

```
public class MEDIAN OF 3 {
```

```
public static void main (String[] args) {
```

```
→ Scanner stdin = new Scanner (System.in);
```

```
System.out.print ("Enter three integers: ");
```

```
int num1 = stdin.nextInt();
```

```
int num2 = stdin.nextInt();
```

```
int num3 = stdin.nextInt();
```

```
int median;
```

```
if ((num1 > num2 && num1 < num3) || (num1 < num2 && num1 > num3)) {  
    median = num1;
```

```
} else if ((num2 > num1 && num2 < num3) || (num2 < num1 && num2 > num3)) {  
    median = num2;
```

```
} else {
```

```
    median = num3;
```

```
}
```

```
System.out.println ("The median is: ");
```

```
}
```

```
}
```
