LARGEST OF 3

```java
import java.util.Scanner;
    public class Largest of 3 {
    public static void main (String[] args) {
    Scanner stdin = new Scanner (System.in);
    System.out.print ("Enter three integers");
    int num1 = stdin.nextInt ();
    int num2 = stdin.nextInt ();
    int num3 = stdin.nextInt ();

    int largest = num1;

    if (num2 > largest) {
        largest = num2;
    }
    if (num3 > largest) {
        largest = num3;
    }

    System.out.println ("The largest is: " + largest);
    }
}
```
